

First Call Restoration

Bio Recovery Clean-up

With the passing comes difficult realities, including the cleanup of a loved one's home. Families need a dependable and experienced company like First Call Restoration to help after such a painful event.

We know we can't make the trauma go away, but we can remove the physical reminders associated with having a death occur in the home. We're experienced, compassionate, professional, and discreet, and every member of our Bio Recovery family will treat you with the dignity and respect you deserve.

In cases of a death or accident where blood is present, there is a risk of exposure to bloodborne pathogens and biohazards ranging from viruses like Hepatitis to bacteria like MRSA. Statistics from the CDC show that 1 in 24 people has either Hepatitis B, Hepatitis C, or HIV. These bloodborne pathogens can cause long-lasting infection in human blood and disease in humans.

These infections can also spread if infected blood or bloody bodily fluids touch mucous membranes or an open sore or cut. Mucous membranes are the moist parts of your body, such as in your eyes, nose, and mouth.

A professional, experienced trauma cleanup company will save you the mistake of spreading stains and contamination or missing unpleasant materials that could later be found in unexpected places.

We adhere to OSHA regulations concerning bloodborne pathogens and practice universal precautions to protect our employees and customers.

One call and we'll take care of it ALL

We are available to help you when ever you need us.

We will work with your insurance company should you chose to use one.
